- Primary Prevention – Targeted to general population, aimed at educating the public about child abuse and neglect, with the goal of stopping abuse before it happens.
- Secondary Prevention – Targeted to individual or families in which maltreatment is more likely
- Tertiary Prevention – Targeted toward families in which abuse has already occurred

This is Federal Measure that reports on a rolling 12 month period. Data Source: N-FOCUS COMPASS-State wards. The children included in this report were victims of abuse or neglect during the first six months of the 12 month period. If the child was a victim of a subsequent abuse or neglect incident within 6 months of the first incident of abuse or neglect they appear on this report. Victims are defined as children where the court or DHHS has substantiated the allegations of abuse or neglect.

- **CQI Structure**
 - Statewide Quality Assurance program with autonomous oversight and dedicated staff
 - Continual training of CQI staff is occurring and QA is collaboratively working with Policy, Training and Administrators to ensure QA's decisions are based upon common policy and to help policy with Administrator's situations
 - Written policies and procedures are being updated and produced where they don't exist
- **Quality Data Collection**
 - Common data collection and measuring process statewide
 - All QA staff are trained and utilize the same QA Tools
 - CFSR reviews are performed by the same staff and reported consistently
 - 2nd level reviews occur on all processes to ensure consistent QA and learning opportunities
- **Case Record Review Data and Process**
 - Quality unit is responsible for all case reviews
 - Case review system has been developed to randomly select cases statewide, provide the QA person with correct review questions and stores results in a non-editable location.
 - Case review system has been modified to allow for testing of specific CFSR questions by service area as needed and generate an email to the worker.
 - Inter-rater reliability testing is ongoing to ensure consistent scoring.
- **Analysis and Dissemination of Quality Data**
 - Statewide case review system has been developed to review all cases selected for review
 - Data is reported statewide and by service area
 - An extensive array of performance reports are created and distributed at monthly CQI meeting
- **Feedback to Stakeholders**
 - Results are used to inform training, policy, stakeholders, community partnerships and others as a means to identify and communicate improvement opportunities and areas of strength
 - Supervisors and field staff understand how results link to daily casework practices; results are used by supervisors and field leadership to assess and improve practice.
 - First stage of CQI communications is monthly Statewide CQI meeting. Second stage of CQI communications is local CQI meetings. At the local level 4-6 areas of improvement have been selected and structured teams created to analyze the results and identify improvement opportunities.
